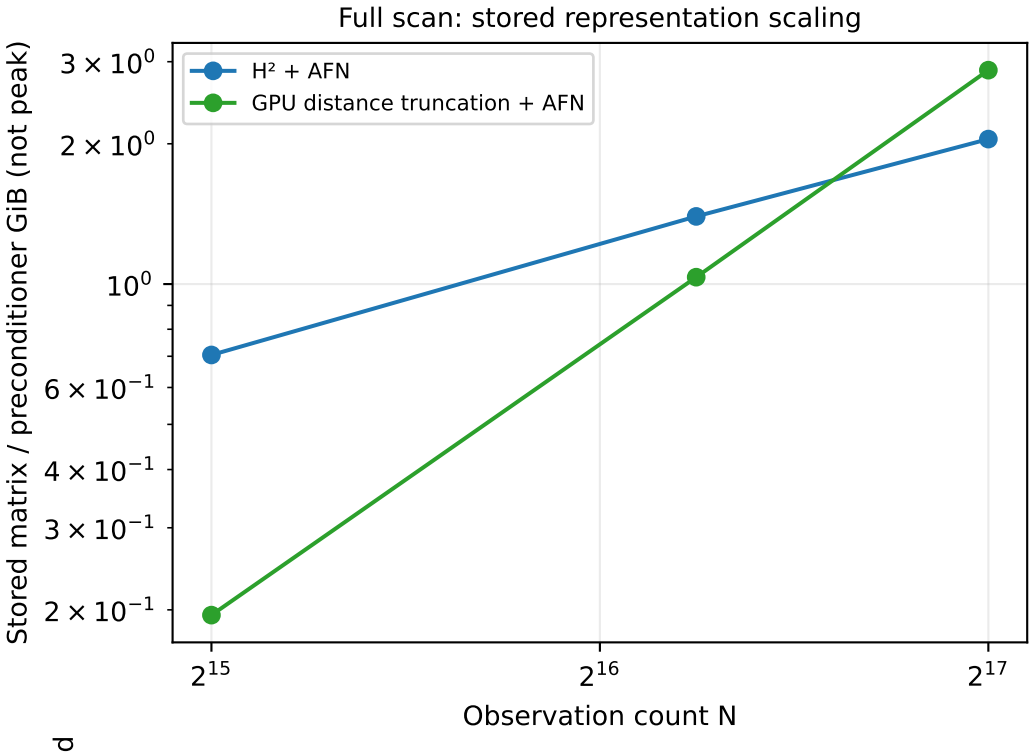
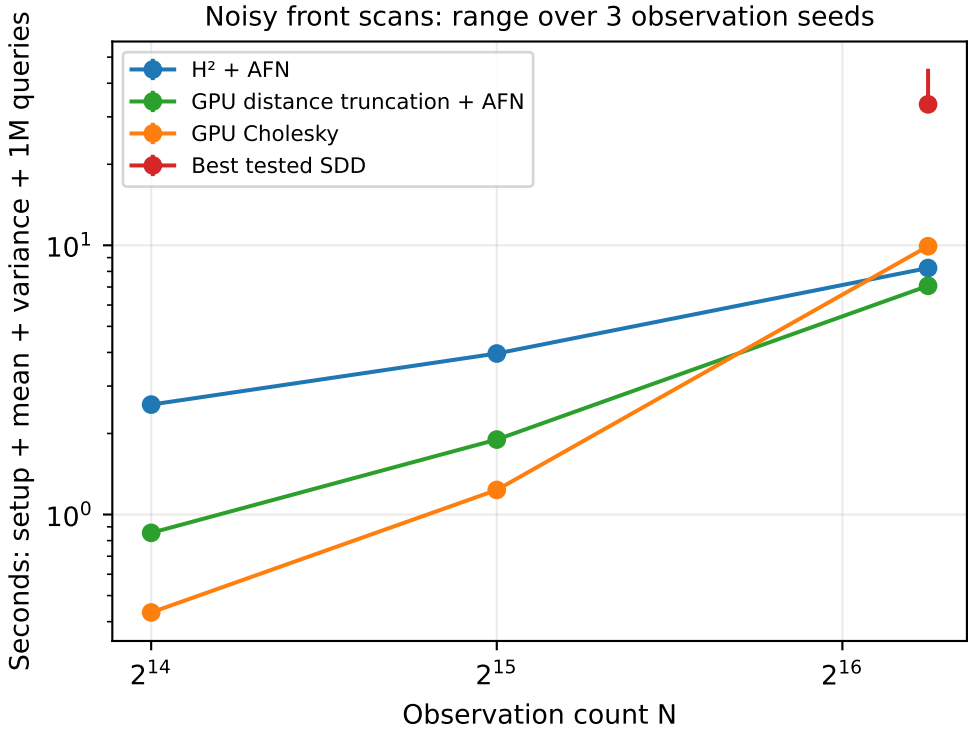
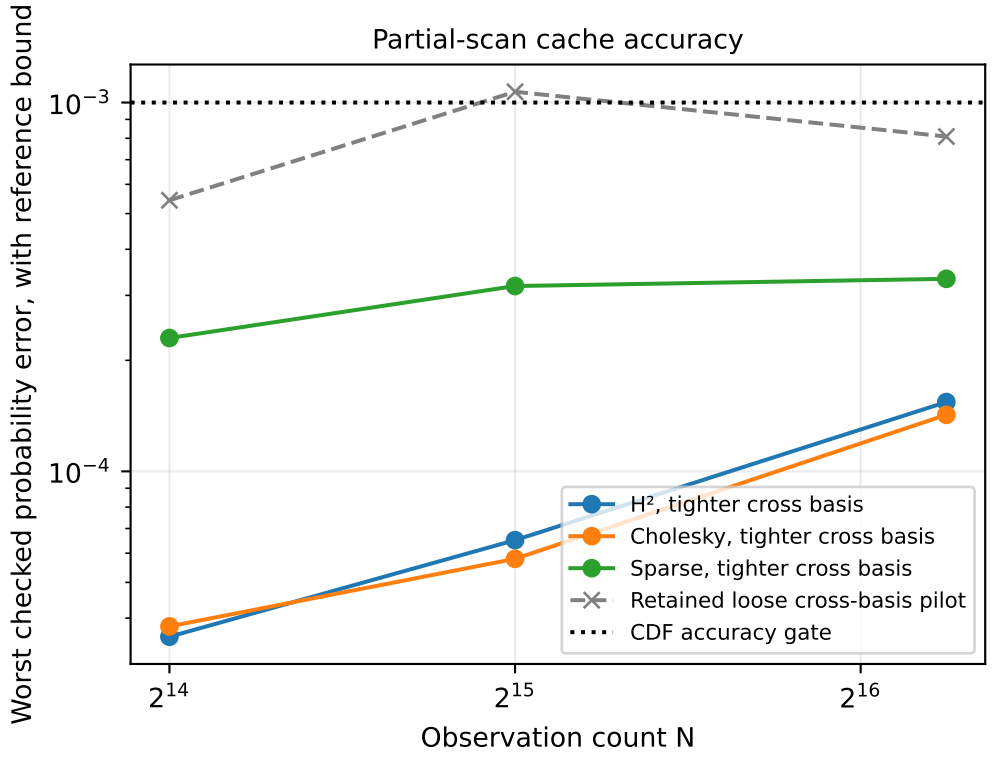
Full scan: 3 timing repetitions, cutoff fixed at 11
H² + AFN
GPU distance truncation + AFN
Seconds: setup + mean + variance + 1M queries
Observation count N



Full scan: stored representation scaling
H² + AFN
GPU distance truncation + AFN
Stored matrix / preconditioner GiB (not peak)
Observation count N



Noisy front scans: range over 3 observation seeds
H² + AFN
GPU distance truncation + AFN
GPU Cholesky
Best tested SDD
Seconds: setup + mean + variance + 1M queries
Observation count N



Partial-scan cache accuracy
H², tighter cross basis
Cholesky, tighter cross basis
Sparse, tighter cross basis
Retained loose cross-basis pilot
CDF accuracy gate
Worst checked probability error, with reference bound
Observation count N
