Noisy ellipsoid: independently selected ℓ; 1,000,000 mean + variance queries
3 held-out scans through 32k; one scan at 131k and for dense-action controls
Normal component noise σ=0.05
Normal component noise σ=0.05
Normal component noise σ=0.05
H² streamed
Locality (storage tuned)
Rejected held-out setting
End-to-end seconds
Sampled peak GPU GiB
Stored/generated interaction entries
Training points N
Normal component noise σ=0.2
Normal component noise σ=0.2
Normal component noise σ=0.2
H² streamed
Locality (storage tuned)
Dense-action PCG (one scan)
End-to-end seconds
Sampled peak GPU GiB
Stored/generated interaction entries
Training points N
