Geometry and uncertainty diagnostics at a known local contact
These checks do not establish probability calibration
σ=0.05
H² streamed
Locality (storage tuned)
Rejected held-out setting
Held-out surface root RMS
Training points N
σ=0.05
Median √variance / |∇mean|
Training points N
σ=0.05
Max CDF error with constant contact variance
Training points N
σ=0.2
H² streamed
Locality (storage tuned)
Held-out surface root RMS
Training points N
σ=0.2
Median √variance / |∇mean|
Training points N
σ=0.2
Max CDF error with constant contact variance
Training points N
